- HTML
- JavaScript

Proficient Skills

- GitHub
- Visual Studio
- Visual Studio Code
- Android Studio
- MS Word
- MS PowerPoint
- MS Excel
- NetBeans

About Me

I am a Computer Science and Application Development graduate with a strong interest in software development, particularly full-stack and backend development. I completed my degree at Varsity College Pretoria with an 84% average and was inducted into the Golden Key International Honour Society in 2024.

I am naturally curious, quick to learn and enjoy solving problems through technology. Throughout my studies, I developed experience with Java, C#, Kotlin, SQL, HTML, CSS, Azure and various development tools, while also building practical applications and working across different areas of software development.

Although I do not yet have formal industry experience in software development, I have a strong willingness to learn, a drive to prove myself and the determination to grow quickly in a professional environment. I am hardworking, adaptable and eager to contribute to meaningful projects, learn from experienced professionals and develop into a strong full-stack or backend software developer. Outside of technology, I am interested in English Football and international cricket, and have a strong passion for the automotive industry, and I enjoy playing chess in my free time.

Experience

IndigoFoods

Catering Assistant

2019-Present

(Part time)

- ❖ Manages the stock-take for fresh and frozen produce and consumables.
- ❖ Assists with placing orders and procurement of consumables.
